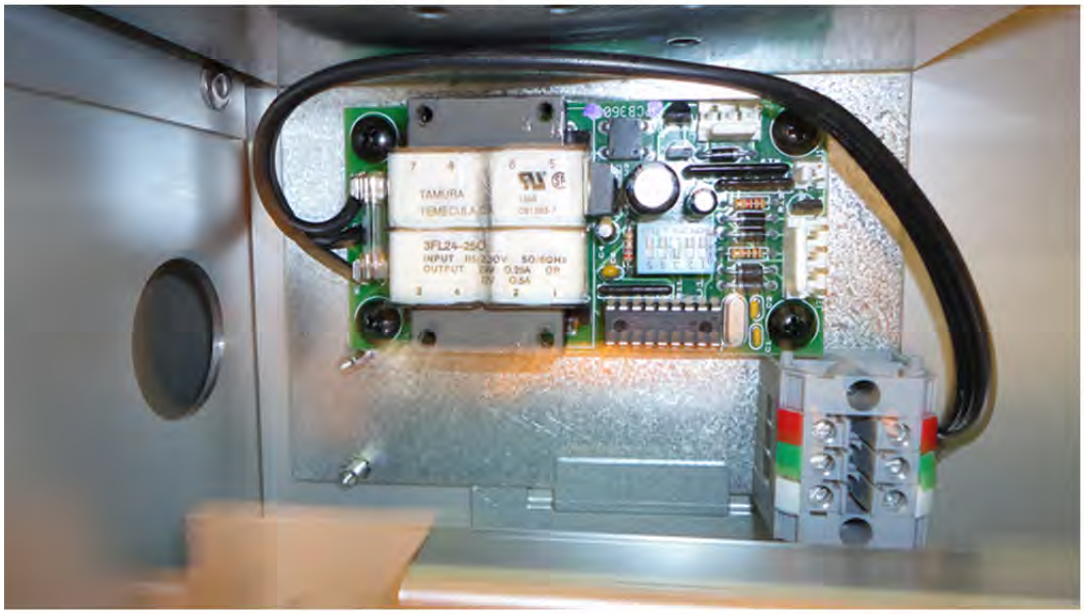
New M.O.E.R. Design



Two Electrical Hook Up Options:

1) Use the 3' cord provided and wire directly into terminal block, then just plug into outlet provided by the electrician.

Please note polarity of insulated wire:

Green	Ground
Ribbed Insulated Black Wire (with seam)	Neutral
Smooth Black Insulated Wire	Hot-Live

2) From the breaker box run your wiring directly into the terminal block provided inside our window header. Please run all wiring from the bottom of the fixed side up to the header, leaving yourself approx. a 5' whip.

Any questions please feel free to contact our service department @ 800-621-5045 ext. 112
