

QUIET COMFORT FOR OPERATORS

Specifically designed to be an integral part of your drive thru operation by providing comfort for your operator in cold weather, while satisfying health department codes for fly fan application when it's warm.

Air flows on the outside of the window so the sound does not interfere with order-taking or teammate communication. It can be mounted above any flush-mount window.

Reduces HVAC heating and air-conditioning loss, and satisfies health department requirements for a fly fan.

SIZE

47.5" wide x 16"high x 21 3/4"deep

Specify Left / Right / or Center Air Flow from outside view

SETTINGS FOR DIFFERENT TEMPERATURES

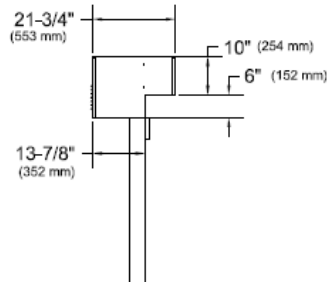

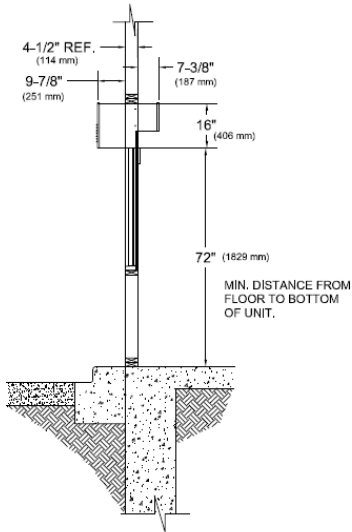

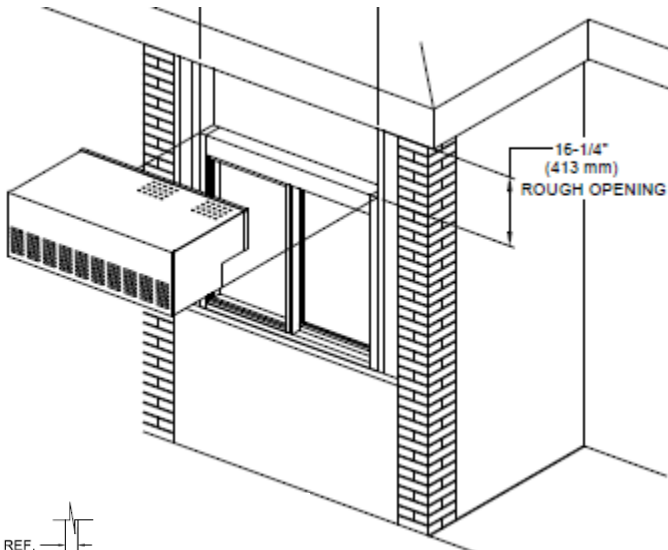

- ◇ **WINTER MODE**
Radiant heat for the operator, with optional outside heated air.
