

The SC100: electronic two-way clear communication between a partition

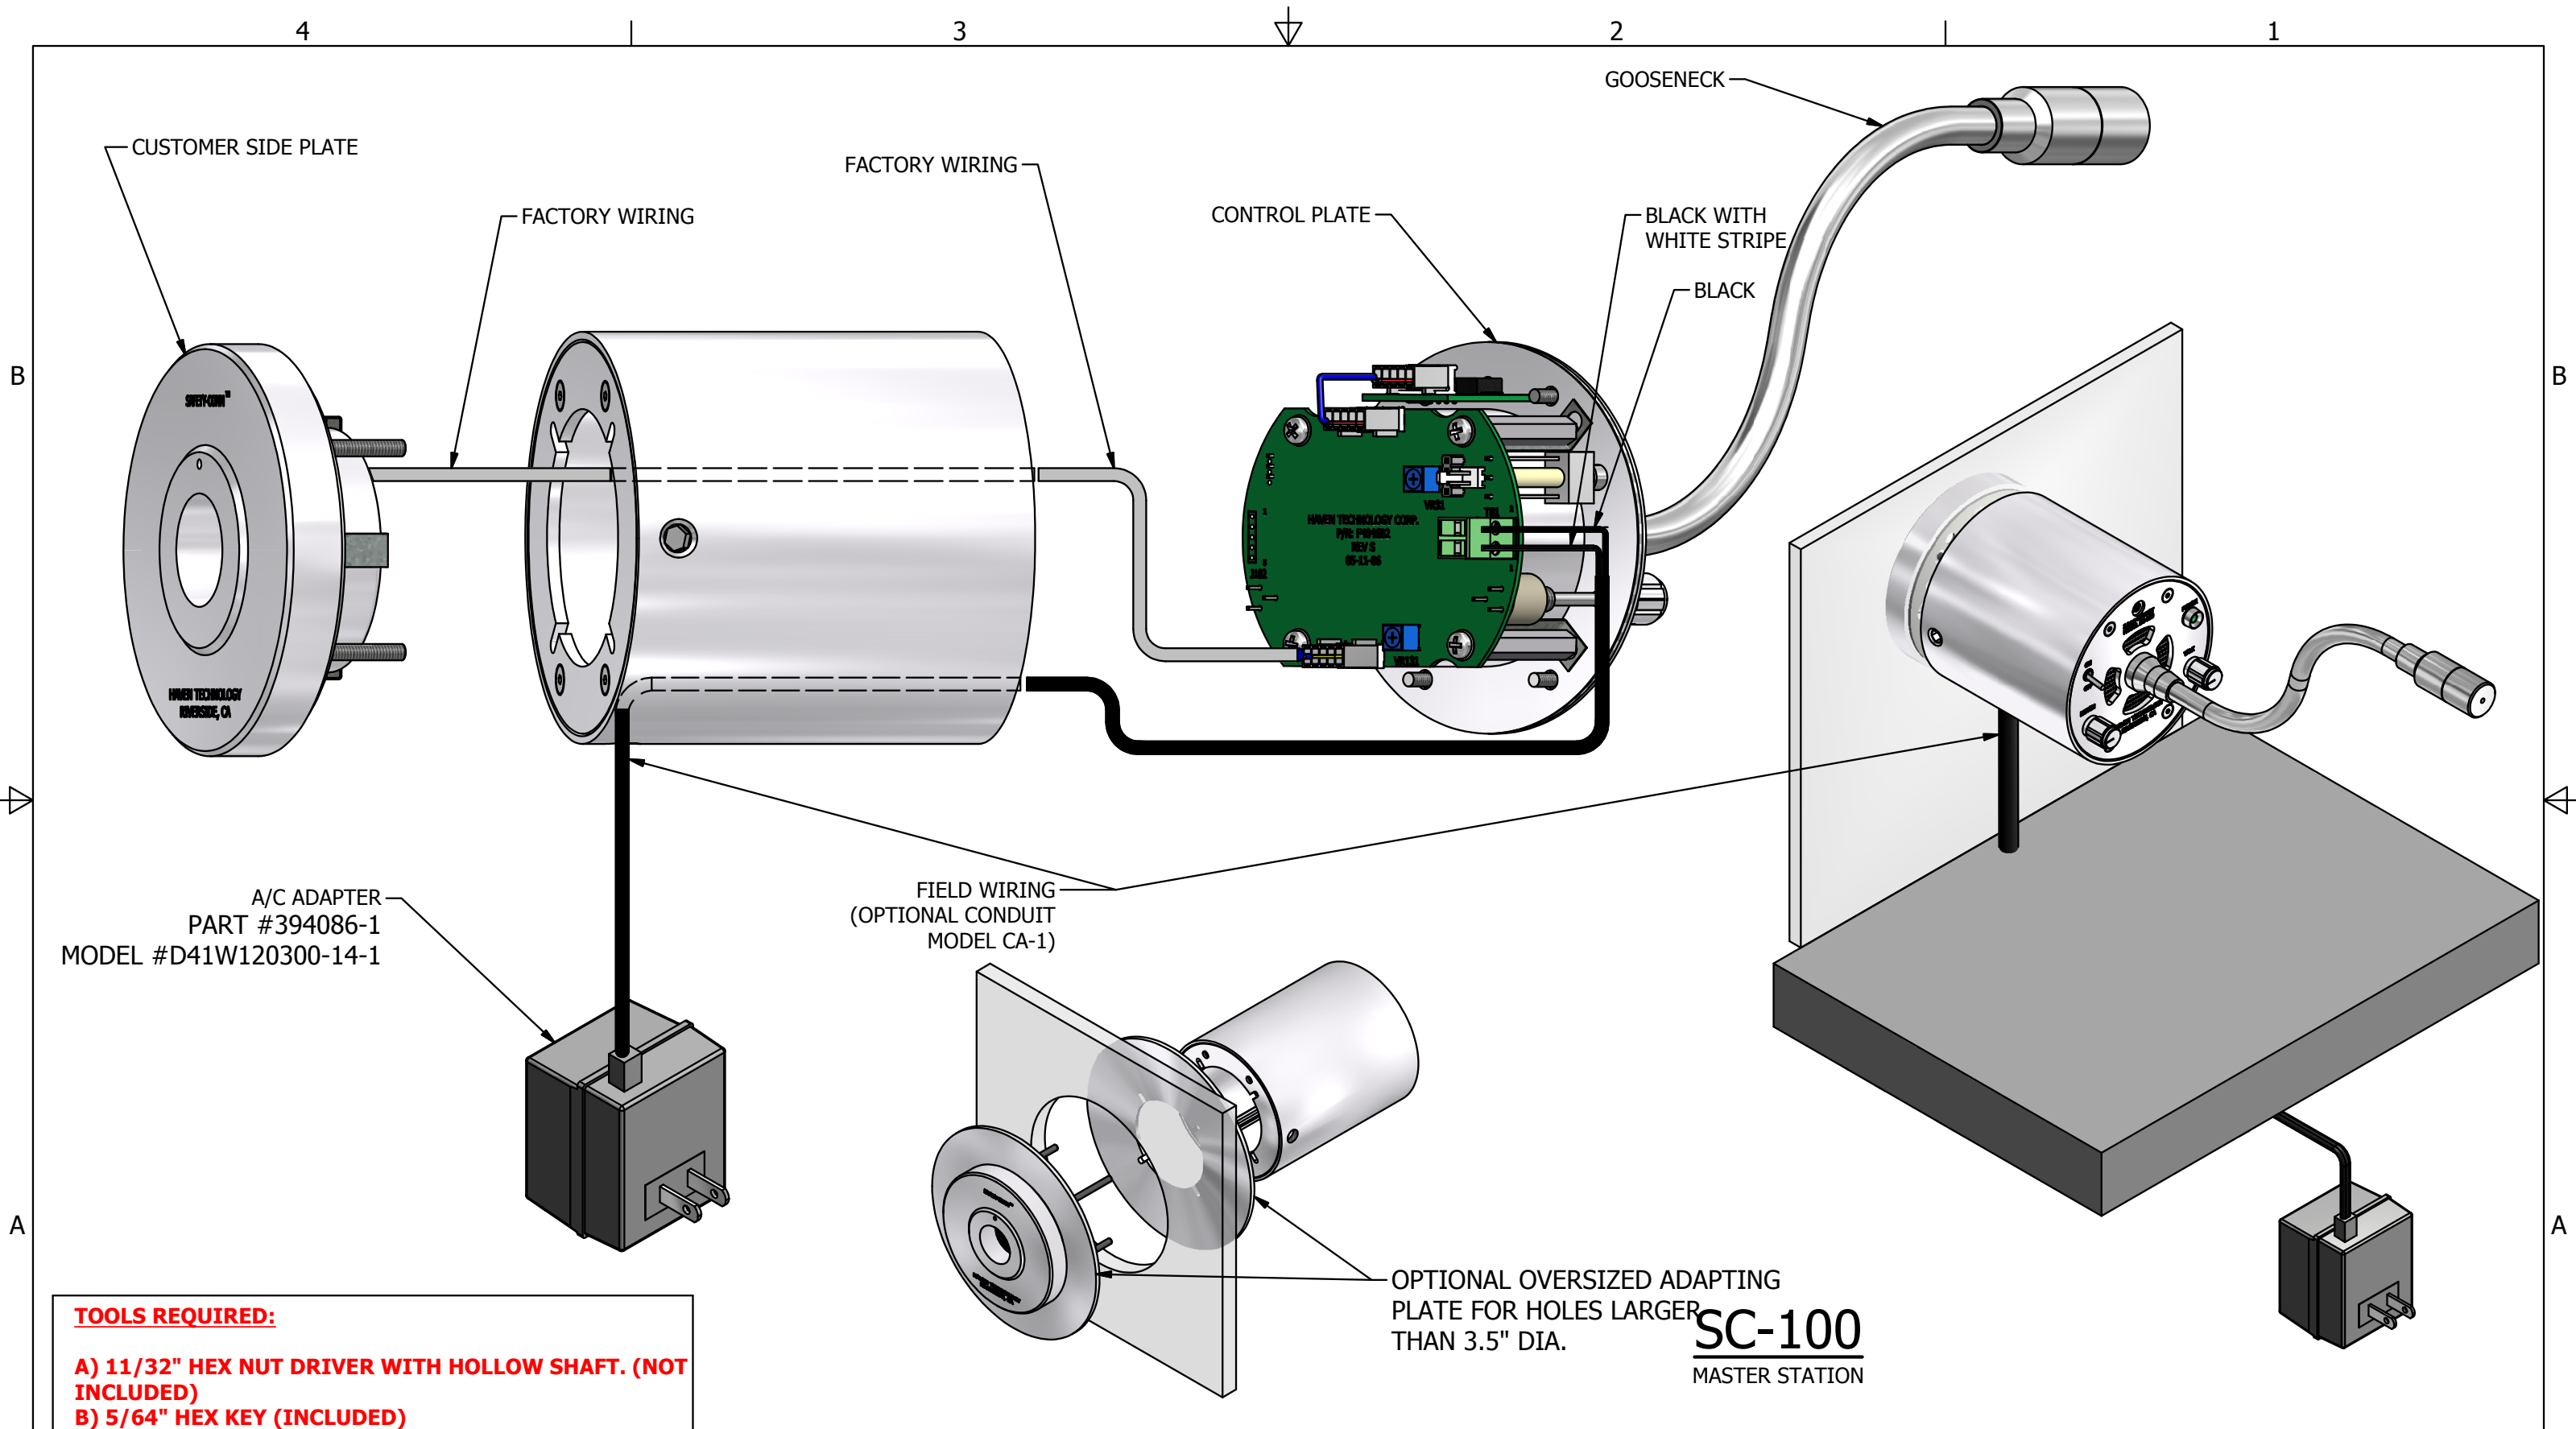

Window-mounted in standard or bullet-resistant glass. This is a one-piece, self-contained unit.

OPERATOR SIDE

Two-way communication is accomplished through the use of speakers and microphones located on each side of the partition. Housed within the rugged enclosure, it provides effective protection while maintaining clear communications.

TOOLS REQUIRED:
A) 11/32" HEX NUT DRIVER WITH HOLLOW SHAFT. (NOT INCLUDED)
B) 5/64" HEX KEY (INCLUDED)
